

## Features Comparison Table

### Enterprise Series

	Print Center	NiceWatch Enterprise
<b>Label Design</b>		
Basic	•	•
Advanced, RFID and Compliance	•	•
Database and Data Processing	•	•
<b>Label Printing</b>		
Basic	•	
Client-Based, User-Initiated	•	
Server-Based, Application-Initiated		•
Server-Based, User-Initiated (Web Printing)	•	
Customized (NiceForm) and Mobile (Pocket NiceLabel)	•	
Local Print Job Redirecting and Reprinting	•	
Centralized Print Job Redirecting and Reprinting	•	•
<b>Integration &amp; Connectivity</b>		
Programming Interface	•	
ERP & WMS Integration	•	•
High-Throughput		•
<b>System Management</b>		
Basic-Single Computer (users, print queues, log)	•	
Centralized, Web-based Printing Management	•	•
Alerting	•	•
Storage Server	•	•
<b>Licensing</b>		
Label Designers and Print Operators	per client	per server
<b>System Requirements</b>		
Database Server: MS SQL Server, MS SQL Express	•	•
Web Server: Internet Information Services (IIS 5 and higher)	•	•

# NiceLabel Print Center

The enterprise solution for client/server based label printing and centralized system management

If your business requires centralized label printing management and real time printer control, then NiceLabel Print Center is the perfect solution for you. The NiceLabel Print Center enables a user to initiate label design and printing on different local clients and manage them from a centralized location.

The enterprise module for server based printing, centralized document, printer and event management:

- **NiceLabel Enterprise Print Manager** – The enterprise module for remote printer, print queue, event and alert management
- **NiceLabel Suite** – The full-featured, modular labeling solution for label design, integration and professional printing requirements

The **NiceLabel Print Center** is a client/server-based enterprise-level labeling solution with centralized control over all NiceLabel clients in a network environment. The **NiceLabel Print Center** enables you to:

- Design and print labels on local client computers.
- Monitor and log all the print jobs inside your printer network.
- Distribute label print jobs from a centralized management interface to all local design and print stations on your network.
- Print labels from a Web browser without any local labeling software installation.

You can manage your printing process through the **Enterprise Print Manager**, which is a web-based module that you can access from any workstation on your network or through the Internet. Real time printer status monitoring and a multi-channel alerting system minimizes the risk of long-lasting production line standstills and ensures that you learn immediately about a label printing error, warning or simple confirmation of an executed print job.

**Storage Server** allows users to centrally manage and access all labels and label related documents.

## NiceLabel Print Center Benefits:

- Centralized printer status control – monitor and optimize your printer network
- Centralized print job management – print job queuing and print job history
- Centralized license management – manage all NiceLabel licenses throughout the organization
- Web Printing options – clients can print labels directly from a Web browser
- Multi-channel alert system – learn immediately about status changes or problems with print jobs
- Client-based label design and printing – distribute label design and printing to any client workstation on your network
- Plus all the **Enterprise Print Manager** functionalities

## Enterprise Print Manager

The enterprise module for server based printing, centralized document, printer and event management

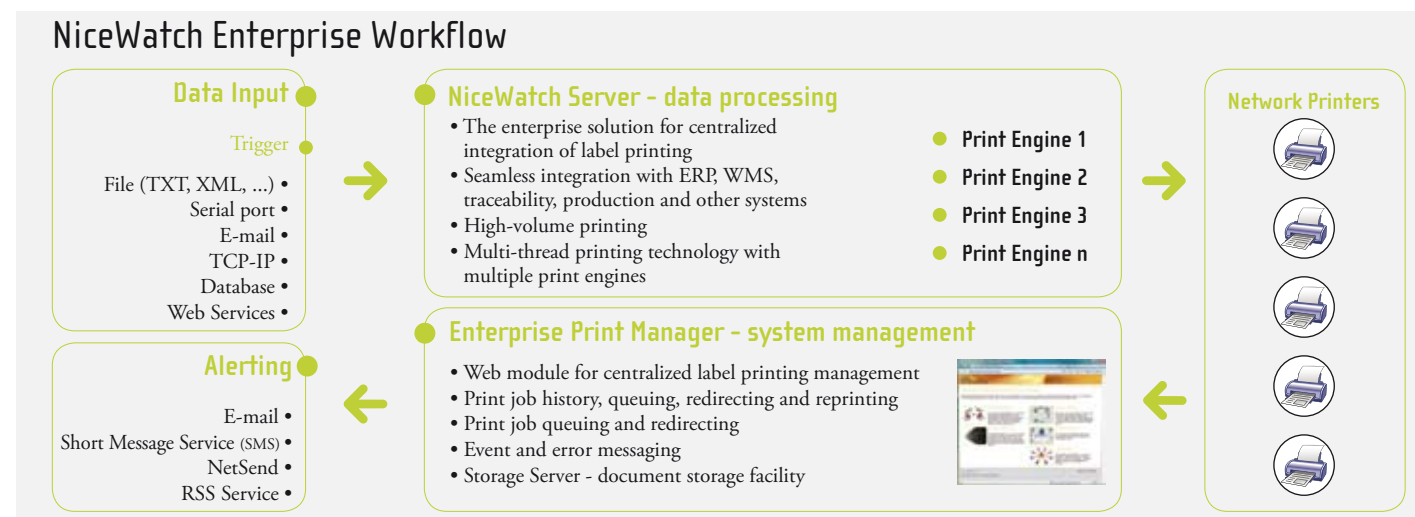

The **Enterprise Print Manager** is an essential part of the NiceLabel Print Center and NiceWatch Enterprise products. The **Enterprise Print Manager** is a web-based application. You can use a standard web browser from any workstation on the network to perform operations like:

- Remote control over the label printing processes through the company's Intranet and the Internet
- Central print management – printer status, print queues and print job redirecting

# NiceWatch Enterprise

The enterprise solution for centralized integration of multi-threaded and high-volume label printing

If your Warehouse Management System (WMS), Enterprise Resource Planning (ERP) system, Hospital Information System (HIS) or any other type of business information system requires high-throughput and high-volume label printing, then NiceWatch Enterprise is the perfect solution for you.

The enterprise module for server based printing, centralized document, printer and event management:

- **NiceWatch Server** – The high-throughput production module for enterprise-level centralized label printing integration
- **NiceLabel Enterprise Print Manager** – The enterprise module for remote printer, print queue, event and alert management
- **NiceLabel Pro** – The advanced label designer for professional bar code and RFID labeling

The **NiceWatch Enterprise** prints large quantities of labels on multiple printers from your WMS, ERP, HIS or other systems. The **NiceWatch Enterprise** provides you with a:

- Multi-threaded printing technology that assures fast and faultless operation even in the most demanding environments.
- Scalable solution that does not require any programming or coding change of your information system.
- Server-based solution that enables applications and systems to initiate label printing from a centralized location.

All printers in your organization can be managed from one location through the web-based **Enterprise Print Manager** module that is also part of your **NiceWatch Enterprise** environment. Real time printer status monitoring combined with a multi-channel alerting system minimizes the risk of long-lasting production line standstill and ensures that you learn immediately about a label printing error, warning or simple confirmation of an executed print job.

## NiceWatch Enterprise Benefits:

- Centralized high-volume printing – multi-threaded printing technology designed for simultaneous printing on multiple printers
- Quick integration – easy implementation into all WMS, ERP and HIS environments like Oracle WMS, MSCA, SAP R/3
- Complete advanced label design – **NiceLabel Pro** label designer included
- Remote administration – centralized event triggering and monitoring from a remote location through the **Enterprise Print Manager** module
- Multi-channel alert system – learn immediately about status changes or problems with print jobs
- Flat server licensing – NOT based on number of printers on the network
- Plus all the **Enterprise Print Manager** functionalities

- Server based document repository allowing users to access stored labels and related documents
- Logging functionalities – centralized logging of all the information on past printing jobs, actions, errors, alerts and other events executed from any workstation in network
- Multi-channel alerting and messaging services – configure email, NetSend, RSS feed and SMS to inform about label print status, warning and errors
- Database housekeeping to manage database size
- NiceLabel Print Center management and NiceLabel client licensing
- NiceWatch Enterprise management

For in-depth information on the Enterprise Series products request additional product flyers:

- **NiceLabel Print Center** – The enterprise solution for client/server based label printing and centralized system management

- **NiceWatch Enterprise** – The enterprise solution for centralized integration of multi-threaded and high-volume label printing
